PERSONAL PROJECTS

IT Service Site (Full Stack) - April, 2021
Links - 🔗 Live Site | git Client Side | git Server Side

Features - This is a digital consultancy website. You can get Digital Marketing, Website Development and SEO support for your startup or business.

Tools Used - REACT.js and Bootstrap in frontend and Node.js, MongoDB in the backend. For authentication and deployment, I used Firebase along with Heroku. Stripe API implemented payment with Paypal.

Book Club (Full Stack) - April, 2021
Links - 🔗 Live Site | git Client Side | git Server Side

Features - This site is a book-buying website. You can order books here. Admin can add books to database and see them in list.

Tools Used - React.js, Material.ui, Node.js, Express.js and MongoDB. Firebase authentication implemented along with deployment. React Router and React Hook Form libraries are used in this project.

Transport Service (React) - March, 2021
Links - 🔗 Live Site | git Code

Features - A functional React website where you can have a transport service. You can find Bus, Car, Bike or Train service. Also, you can give your pickup and drop location.

Tools Used - REACT.js in frontend and used fake data in JavaScript.

CERTIFICATES
